### **REASONS FOR ALLOWANCE**

1. Claims 1-3, 5-11 and 13-15 will be allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not provide for nor suggests providing for as follows:

A mobile communication terminal comprising detection conditions acquisition means for acquiring detection conditions data including a letter string from a detection conditions distribution server and storing the detection condition data in a detection condition storage means, wherein the detection conditions acquisition means sends category information input at a user interface of the mobile communication terminal to the detection conditions distribution server, and acquires detection condition data including a letter string relevant to the category indicated by the category information sent by the detection conditions distribution server (see, e.g., specification, page 90, paragraph [0140]) .

The closest prior art (Paul Patent No. 6,052,709) teaches a user-terminal filtering application includes an exclusion list manager for creating, storing and maintaining a user exclusion list. Paul further describes that the user exclusion list includes all identification data needed to determine the status of incoming e-mail messages, and that data in the data exclusion list is divided into categories corresponding to the fields of incoming e-mail messages. Paul depicts that the fields include specific terms that are included in certain portions (i.e., "TO", "BCC", etc.) of incoming e-mail messages, as set by a user. Additionally, Paul describes that the user exclusion list may be created and maintained and modified manually by the user or service provider (see, e.g., col. 5, line

Art Unit: 2454

62 to col. 6, line 16).

Therefore, Paul fails to teach or suggest that a user sends category information to the device that manages the user-terminal filtering application in order to retrieve a letter string relevant to a category of mail to be detected. Instead the user in Paul directly modifies the parameters included in the exclusion. The submission of such parameters to the exclusion list does not constitute sending category information to a detection conditions distribution server. Moreover, the result of modifying the exclusion list is not the acquisition of detection condition data including a letter string relevant to the category indicated by the category information sent, as claimed.

For these reasons, in conjunction with the other limitations of the independent claim, puts this case in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
